Personal data controller no. 38299 **Technical Investments Service No. 15673 / 20.05.2025**
Technical Consultation

To, Allbizz SRL municipality of Sibiu, 23 Calugareni St.

Regarding the application registered at Apă Canal Sibiu SA under no. 15673/19.05.2025, for the premises of the Energetic Technical College located in the municipality of Sibiu, 1 Electricienilor St., we inform you of the following:

For water:

- the premises have a PE 110 mm water connection, which can provide a water flow of approx. 10.00 l/s under economic velocity conditions;
- the connection is linked to the existing PE 200 mm water distribution network on Vasile Aaron St., a network that operates at a legal pressure of 3.50 bar and transmits a water flow of approx. 45.00 l/s under economic velocity conditions;
- within the objective's area, there are 4 underground fire hydrants Dn 80mm, located as follows:
 - on Vasile Aaron St. at the intersection with Șoimului St.;
 - on Liliacului St. at the intersection with Vasile Aaron St.;
 - on Vasile Aaron St. at the intersection with Giuseppe Garibaldi St.;
 - on Semaforului St. at the intersection with Electricienilor St., hydrants that can each ensure a flow of 5 l/s, the operating pressure being 3.5 bar.

Apă Canal Sibiu SA supplies drinking water at quality parameters according to Law 458/2002 and at an operating regime according to standard SR 4163-1/1995 art. 2.2.2.4. - Water distribution networks in urban localities.

The water supply is provided 24 out of 24 hours, in compliance with the provisions of Order no. 88 of 2007 of the National Regulatory Authority for Community Services of Public Utilities, including articles no. 227 and 228, and the Water Supply and Sewerage Regulations.

For domestic sewerage:

- the premises have two domestic sewerage connections: 1 connection B 150 mm discharging into the B 300 mm sewerage network on Vasile Aaron St. and 1

connection B 300 mm evacuating into the existing B 500/750 mm sewerage network on Semaforului St.;

For rainwater sewerage:

- there is no rainwater sewerage network within the site area.

The technical consultation is valid for the technical conditions existing at the current date.
